Website Design & Development Framework

1. Discovery & Planning	2. Design & Prototyping	3. Development & Testing
<ul style="list-style-type: none">• Client Consultation & Goal Setting• Research & Competitor Analysis• Project Scope & Sitemap	<ul style="list-style-type: none">• Wireframes & Mockups• UI/UX Design• Feedback & Revisions	<ul style="list-style-type: none">• Front-End Development• Back-End Integration• Testing & QA

Our Workflow

1. Introduction

This framework outlines a proven process for designing and developing high-performing, scalable, and conversion-focused websites. It ensures clarity, efficiency, and measurable results at every stage.

2. Discovery & Planning

Objective:

Understand business goals, target audience, and project scope.

Key Activities:

- Requirement gathering
- Competitor analysis
- Target audience definition
- Feature planning
- Technology selection

Deliverables:

- Project scope document
- Sitemap
- Feature list

3. Strategy & UX Planning

Objective:

Create a user-focused structure and journey.

Key Activities:

- User journey mapping
- Wireframing
- Conversion funnel planning
- CTA placement strategy

Deliverables:

- Wireframes
- UX flow diagrams

4. UI Design

Objective:

Design visually appealing and brand-aligned interfaces.

Key Activities:

- Design system creation
- High-fidelity mockups
- Responsive design layouts

Deliverables:

- UI designs (desktop & mobile)
- Design assets

5. Development

Objective:

Build a fast, secure, and scalable website.

Key Activities:

- Frontend development
- Backend integration
- CMS setup (if applicable)
- API integrations

Deliverables:

- Functional website
- Admin panel / CMS

6. Performance Optimization

Objective:

Ensure fast loading and smooth performance.

Key Activities:

- Image optimization
- Code minification
- Caching setup
- Core Web Vitals improvement

Deliverables:

- Optimized website

7. SEO Implementation

Objective:

Improve visibility on search engines.

Key Activities:

- Keyword optimization
- Meta tags setup
- Sitemap & robots.txt
- On-page SEO

Deliverables:

- SEO-ready website

8. Testing & Quality Assurance

Objective:

Ensure a bug-free and consistent experience.

Key Activities:

- Cross-browser testing
- Mobile responsiveness testing
- Performance testing
- Security checks

Deliverables:

- Tested and validated website

9. Deployment & Launch

Objective:

Go live smoothly and securely.

Key Activities:

- Hosting setup
- Domain configuration
- SSL installation
- Final deployment

Deliverables:

- Live website

10. Maintenance & Growth

Objective:

Ensure continuous improvement and performance.

Key Activities:

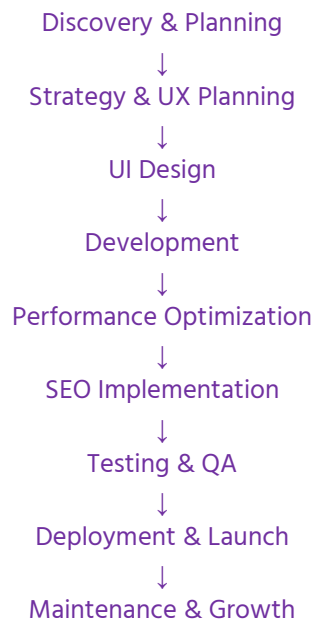

- Regular updates
- Security monitoring
- Performance tracking
- Feature enhancements

Deliverables:

- Ongoing support & updates

11. Visual Workflow

Below is a simple visual workflow of the end-to-end process:

12. Conclusion

Following this structured framework ensures your website is not just visually appealing, but also optimized for performance, scalability, and business growth.
